TECH RIDER · DJ SET · V1

TECH RIDER

Hardstyle & dubstep · USB DJ set · to be confirmed with each venue

01 DJ BOOTH

- 2 × Pioneer CDJ-3000 (CDJ-2000NXS2 minimum), Pro DJ Link, up-to-date firmware.
- 1 × Pioneer DJM-A9 or DJM-900NXS2 (V10 accepted). The set is played from 2 USB sticks (rekordbox): no laptop needed.
- Stable table at least 1.20 m wide, 90–100 cm high, 2 × 230 V sockets on the table, booth light.

02 MONITORS

- 2 monitor speakers (12" + sub if possible) on an independent circuit, level adjustable from the booth, no delay with the front of house.

03 FRONT OF HOUSE

- Professional system that reproduces 35–60 Hz cleanly at high volume (the hardstyle kick lives between 40 and 60 Hz): plenty of subs, limiters set by a technician present during the set.
- 10-minute line check before doors or before the slot.

04 LIGHTS & VIDEO

- If there is an LED screen: official visuals are provided (4K clip, logo, chrome name) — never retype the name. Strobes on drops only, never continuously.

05 HOSPITALITY

- Still water, towels, a quiet space or dressing room, 2 guest-list spots, parking or drop-off nearby.
- Travel, accommodation and schedule: defined in the booking contract.
